Fibula technologies are developing at an overwhelming speed. In order to keep up with improvements in technology and techniques, we have a unique opportunity to take part in a state-of-the-art surgical course (Fig 1). A Fibula Teeth Course (fibulateeth.com) is a cutting-edge one-day course held in Texas 2-3 times per year. The course consists of lecture, computer training, and a hands-on lab experience. Its program, based on a fundamental experience of Dr. Fayette Williams and his team, gives a chance for participants to absorb incredible developments extremely useful for the oral-maxillofacial surgeons, prosthodontists, and ENT/plastic surgeons. Obtaining such knowledge can bring to our practice a lot of new treatment options to guarantee the surgical results our patients deserve.
